

Bob Lemon

Has it really been 50 Years? Goodness gracious how time has flown by. Life seems so very short when one considers that we graduated 50 years ago.

As you both know, I have been married to Nadine (Solomon) formerly of Highland Park and Southfield for 33 years and have two children (both married) in their 30's and one grandchild Ethan Hayes (our daughters son) now 5 years of age. I have been employed for the last 17 years by Comau, Incorporated (formerly "PICO" Progressive Tool and Industries, Inc. Comai is an Italian firm, our US corporate headquarters are in Southfield. Previously I was employed by Robotron Corporation (now defunct) for 28 years. I attended Radio Electronics and Television School (Detroit) and earned an associates certificate in Electronics Engineering then went on to Lawrence Tech to earn a B.S. in Electrical engineering.

We have moved around a little bit. My parents built a home on Lake Sherwood in 1966. I lived with them off and on until I bought my first home in Berkley. We lived in it for 2 years and bought another home in Berkley. We lived there for 8 years and bought a home in Waterford. We lived there for 5 years and bought a home in Brighton Township (Milford mailing address). We lived there for 12 years then bought yet another home in Green Oak Township (Brighton mailing address). We have lived here for 6 ½ years now and enjoy being within 10 minutes of our children.

At this time I have no plans of retirement. Many of our fellow classmates probably are already retired. My outlook is that as long as I can be productive, I will continue working at what I enjoy and am proficient at. We do take occasional vacation time in good weather with our 5th Wheel Travel Trailer. We also take one day trips occasionally as well as visit Nadine's brothers occasionally, one in Nicholasville KY and the other in northern Tennessee Northeast of Knoxville.

I lost my Dad in December 1982 (76), my Mom in July 1999 (93), my next older brother Bill in January 2005 (69). My oldest brother Jack now 73 is still living. That pretty much sums up the family and unfortunately, none of us will live forever.

I guess that Jack and I have inherited longevity from my mother. I have enjoyed a relatively healthy life since recovering from childhood Rheumatic Fever. Only complication was an enlarged Heart but all murmurs have long since gone away.
