

## Erma Tobel Wearsch

The past fifty years Glenn and I have been busy enjoying our life together. We just celebrated fifty years of married bliss. We have three children, five grandchildren and four great grandchildren.

Glenn worked in construction in partnership with my two brothers for many years. My older brother past away and the company was dissolved. With some time on his hands he decided to get his charter boat license and I was his first mate. It is also called blame it on Erma if fishing is slow. We fished on the great lakes in the summer months and fished on the ocean in the winter months. His fishing business became very successful and this is because I was first mate-you know finding the right places to get lots of fish-right ??? One day a fishing party boarded our boat and Glenn started talking about heavy duty truck parts. Glenn previously helped his mechanic in his construction business maintaining the trucks. He was offered a job, the rest is history. Glenn retired eight years ago as a salesman selling heavy duty truck parts for this business.

I was in the banking business working with mortgages and commercial loans for twenty eight years. In 1999 I retired due to health problems.

We currently live in Florida however we will be here in Michigan till October to visit with our children, celebrate our anniversary, baby showers, bride to be shower and a wedding. We take short trips with our camper, however we call Florida our home. Our dream was to enjoy our retirement years and to be honest with you, it sure has exceeded our dream.

Before retirement we were avid snowmobilers, taking our snowmobiles to upper Michigan where it snows a bunch, to Canada, and to Wyoming to see Yellowstone and lots and lots of snow there also, and what beautiful sights. We enjoyed snowmobile for at least twenty years but old age the cold weather got into our bones.

We look forward to seeing and visiting with our SHS class of 57 classmates.
